GAMES, TOYS, KIDS UTILITY PRODUCTS AND FURNITURE, ALL MADE OF WOOD.

**EXPORT MARKETS** : U.K. , U.S.A. , NETHERLANDS, AUSTRALIA, SPAIN, FRANCE, ITALY, GERMANY.

**STAFF** : 28 PERMANENT STAFF & APPROXIMATELY 110 SUBCONTRACTED STAFF.

We are a company manufacturing wooden toys for export and has been functional since 1992.

We use permissible timber in production, certified by the Forest Department of Sri Lanka, such as treated rubber, aristonina, and albesia. Rubber wood is a plantation timber whilst the others are cut down for forest control. We also use MDF and high quality plywood with acceptable levels of formaldehyde.

All our products strictly conform to the EN 71 / ASTM safety standard and are manufactured under very high supervision levels to eliminate quality problems. Paints used are lead free, non toxic and child friendly and certified by SGS laboratories.

No child labor is used directly or indirectly at any point in our manufacturing or packing process. As we serve and deal with many Fair trade organizations we pay fair wages to all our employees and conform to fair trade standards. We also uplift the standards of a large number of our sub contractors that supply us with parts of our products, by paying them fair prices.
